Assistant Commissioner for Patents
Washington, D.C. 20231

Sir:

Prior to examination, please amend the application as follows:

IN THE CLAIMS:

Please cancel claim 1 and add the following new claims:

82. In a Web-based business-to-business electronic commerce system including a database and a Web server, a method of selecting products for purchase, comprising the steps of:

- a Web user during a first session selecting at least a first product;
- the system storing identification of said first product within a first product collection; and
- the Web user during a subsequent session causing the first product collection to be retrieved.
